# Sonic Pi v2.0
Competition for Schools

Are you the next Daft Punk?

Make sure there's more than a screwdriver in your sonic toolbox.

Sonic Pi is a way to get creative with music and computing. We're hunting down the UK's best young musical coding talent from outer space: is it you? Create a 2-minute or 200-line piece of music on the theme **Space Wonders** with Sonic Pi v2.0 on a Raspberry Pi, and you could be in with a chance of winning one of hundreds of Raspberry Pi kits for yourself and your school, along with workshops with musical artists Juneau Projects, and with live coder-musician Sam Aaron!

Check out **raspberry.org/competitions/sonic-pi** to find out how to enter.
